I agree it will be an intermittent job. Are you referring to Rebecca Broussard or Russo. I think we need to understand more about this task, ie is it only referring calls or will it be to provide answers on a variety of topics from the region. Broussard may know best what this will entail.

David Laura – thoughts? Is this a full time job or is something maybe Rebecca can do?

Carl, Enrique, Martin,

I am coordinating EPA's public hotline for the Gold King Mine release incident in Durango. SRA, a contractor managed out of HQ, is now answering/responding to as many calls as possible using a script developed by Area Command and approved through headquarters. However, we need a contact in R6, R8, and R9 who can follow-up, as appropriate, on public calls from the respective regions where SRA is unable to respond. The hotline is scheduled to be available to the public for the next two years, although we do not anticipate a large call volume.

Can you please send me a contact from each of your regions who can respond to the outstanding calls? I can provide access to the SharePoint call log that R6 set up, so everyone can check the log, respond as needed, and close out the requests in the log. To facilitate this, I will ask SRA to highlight calls needing regional follow-up as we move forward.

Many thanks,

Brooke
